ABOUT ME

Highly motivated and passionate Frontend Developer with **2+ years of experience** developing superior web applications. Quick learner, driven by a desire to achieve exceptional results with minute attention to detail and effective time management.

WORK EXPERIENCE

Frontend Developer - DPS Software
04/2023 - Present | Argentina

- Implemented a real-time vehicle tracking and trip auditing system for several passenger transport companies, **achieving a 100% reduction in travel fees theft**.
- Built a store auditing and competitor analysis system for international brand Topper, enabling staff to evaluate retail presence, monitor auditors' activities, and track daily store visits by location and employee.
- Developed a task-based workflow platform with interactive diagramming, allowing businesses to model processes, assign tasks to employees, and monitor progress from initiation to completion.
- Created a mobile application that allows companies to monitor employee arrivals and departures using QR code authentication.
- Trained newcomers on tools, resources and best practices.
